Dear Hiring Manager,

I came across your job posting for a software developer on your website. I am now a junior I.T with Cyber Security option student at Kean University and I am excited to apply my coding skills to use in the workplace. I would like to apply for a position with your organization in the fall of 2022.

Your company develops software that creates and administers websites, according to your website. I've built websites before and am interested in learning more about the software that controls their content.

I believe I could contribute significant insight into the design and layout of websites that stand out from the just functional ones because of my passion for combining my programming skills with my creative aptitude. Not only would this be beneficial, but I am learning and benefiting from this experience, and I believe your firm will as well.

I'd want to be able to put my computer programing skills to good use in this profession. I am looking forward to meeting you and hearing from you as soon as possible. You can get over to me by email at pateldhruval442X@gmail.com or by phone at 646-204-20XX. My resume, which is including, goes into greater information about my qualifications.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,

Dhruval Patel
